Subject: Use some common sence when you re draw the lines !

Please read to the new Lines Drawn by people asked to fix the "silly" district lines drawn years ago!

I am in Santa barbara, my office is in San Jose 280 miles away because of someone who is very un educated... you can divide the work load how ever you want, but when it comes to having to drive in and do something like a hearing, have the computer automatically send the person to the closest place, which for me is only 25 miles away in Ventura.

Thanks
